

Podiatry

Caring for your feet can help with improving blood flow and mobility, as well as to assist in managing complications related to Chronic Diseases such as Diabetes.

Our Podiatry team provide assessment and treatment for older adults requiring foot care, as well as in the areas of Paediatrics, Diabetes and Biomechanics.

Some of the services our Podiatry team offer include:

- General foot care
- Nail surgery and care
- Treatment for corns and calluses
- Treatment for foot and ankle pain
- Orthotics
- Wound care/ Advanced Foot Clinic
- Footwear assessments and advice

Our Advanced Foot Clinic is our Podiatry service that works in conjunction with Eastern Health, to provide specialist foot and ankle wound care.
