

Meet our Neuropsychologists

Michele Hervatin

Michele Hervatin is a Clinical Neuropsychologist with over 7 years of experience in providing comprehensive neuropsychological services to children, adults and older adults.

Michele is highly experienced in providing neuropsychological assessments to children and adolescents with a diverse range of complex presentations. She has worked with clients with neurodevelopmental disorders, including **Attention-Deficit/Hyperactivity Disorder (ADHD)**, **Autism Spectrum Disorder (ASD)**, **Severe Language Disorder** and **Specific Learning Disorder**. She has also provided neuropsychological assessments to children with neurological and medical conditions, such as cerebral palsy, traumatic brain injury, stroke and epilepsy.

Michele has worked across a variety of services including community health, paediatric rehabilitation and therapeutic service delivery for children who have experienced trauma and neglect. She is passionate about working collaboratively with children and families to increase their understanding of a child's specific strengths and weaknesses and to create individualised recommendations to optimise a child's cognitive, social and emotional functioning.

With a Bachelor of Arts (Honours in Psychology) and Masters of Clinical Neuropsychology at the University of Melbourne, Michele is registered as a Clinical Neuropsychologist with Supervisor Status with AHPRA Psychology Board of Australia.

Carly James

Carly James is a Clinical Neuropsychology Registrar with considerable experience working with client groups across the lifespan.

Carly has worked within a number of different services, including paediatric community health, specialist cognitive disorder outpatient clinics, and rehabilitation and inpatient services. She has also worked conducting neuropsychological assessments for children in the Justice System and outreach services to rural and remote communities. She has experience working with a broad range of clients, including those with **neurodevelopmental disorders**, **acquired brain injuries**, **complex mental health presentations** and other **neurological disorders**.

Carly is highly experienced in providing comprehensive neuropsychological services, including conducting formal assessments and working collaboratively to develop individualised strategies and recommendations to enable children to reach their full potential. She is passionate about working with families and their children to identify specific strengths and weaknesses in order to reach their goals and manage any challenges.

With a Bachelor of Psychological Science (with honours) at the University of Tasmania and Masters of Clinical Neuropsychology at the University of Melbourne, Carly is currently registered with AHPRA Psychology Board of Australia and is currently completing the registrar program in Clinical Neuropsychology.

Please contact us on 9430 9100 to make an appointment.

You do not need a referral to see a Neuropsychologist or for a Neuropsychological assessment.

Inspiring people and
communities to be
healthier and inclusive
